

CLUB IN-A-BOX

Our Club in-a-Box STEM kits provide an easy, all-in-one solution for bringing engaging, hands-on science lessons to your school's after-school science club! Choose from a variety of exciting topics designed for students in grades 1-5.

Kits include:

- Four comprehensive lesson plans per topic
- Easy to follow, step-by-step directions with instructional videos
(No science background needed- we provide the science, you provide the fun!)
- Materials for 25 students per lesson
(You just provide classroom materials such as scissors, markers, etc.)
- Informational Parent Page Lab Sheets that correspond with each lesson
- Club topics change each year

Why us?

Science Explorers is an award-winning science company providing STEM based programs to schools since 1999. We've partnered with hundreds of schools and educational organizations to deliver science programs that bring learning to life.

DIY KITS

Our DIY lessons are a flexible and affordable way to add science programming for your students. They can be made synchronous or asynchronous. All materials and lessons are included, including pre-recorded video lessons.

IN-PERSON OR VIRTUAL EXPERIENCES

Science Explorers Field Trips and Assemblies offer an "edutaining" hands-on experience for students of all ages.

Why us?

Science Explorers has brought STEM based programs to schools since 1999. We specialize in customizing DIY programs and virtual events that align with state standards and science enrichment. The best part? All of our programs are eligible for grant funding.
