

# SCIENCE EXPLORERS<sup>®</sup>

## ASSEMBLY PROGRAMS

### UNDER PRESSURE

Join us for an exciting show packed with high-flying experiments! We'll experience Bernoulli's Principle in action, watch spuds take flight as we explore the power of air pressure, feel the rush of wind as we create a low-pressure system with our "wind machine," uncover the surprising truth about the weight of air, and get blown away by our flying toilet paper demonstration!

### KOOKY CONCOCTIONS

Join us for some explosive fun, foamy madness, and a whole lot of WOW! We'll use scientific powers to unleash a genie in a bottle, whip up elephant toothpaste, make dry ice bubbles, witness a bubbly color-changing concoction, and watch in wonder as we layer liquids. Who knew science could be this awesome?

### CRAZY CHEMISTRY

Join us as we delve into the eye-popping world of chemistry! Experience exothermic and endothermic reactions, be astounded as you watch a liquid change into a solid right before your eyes, examine the amazing properties of dry ice, be amazed by our disappearing water trick, and observe color changes in our acid and base lab.

### LET'S GET ENERGIZED

Join us as we explore energy and its various forms. Learn the secret of the golden lever, watch as energy is transferred and helps make things fly with our giant slingshot, see our floating hovercraft in action, and even be part of a human extension cord to make a light glow. It's sure to be electrifying!

### PRICING

45 Minute Assembly: \$695  
Back-to-Back Assembly: \$50 off each assembly
